

SCUOLA DI DOTTORATO IN FISICA

Seminari dei DOTTORANDI

Seminari di fine ANNO

15 Dicembre 2011, Seminar room in Villa Bazzoni

09:00 DANIELE TAVAGNACCO - ASTROFISICA

Analysis and Characterization of Systematic Effects in the Study of the Cosmic Microwave Background Anisotropies with the Planck LFI instrument

09:15 VALENTINA GRIECO - ASTROFISICA

Metallicity effects on the SNIb/c and GRB rates in Irregulars and Spirals

09:30 PAOLO GIACOBBE - ASTROFISICA

Photometric transit search for planets around cool stars from the Western Italian Alps: A pilot study

10:00 EMILIANO MUNARI - ASTROFISICA

The scaling relation between mass and velocity dispersion for simulated groups and clusters of galaxies

10:15 EMANUELE CONTINI - ASTROFISICA

Dark matter haloes and galaxies: semi-analytic approach and comparison with observations

10:40 BREAK BEFORE THE OATS SPECIAL-SEMINAR

Trieste la bella addormentata" (Beniamino Pagliaro)
